Our custom management services are focused on providing for the leasing and management needs of tenants, private investors and relocation companies. Our efforts are focused on residential management. We dedicate our attention to this important area of Real Estate Management without the burden of being all things to all clients. Effective management of any Real Estate Investment is the key ingredient between the Property Owner and the Tenant to ensure the potential profit for the Investor.

Property Management is our ONLY business! We do not buy or sell Real Estate. There's a lot to know if you want to successfully manage residential real estate in North Carolina. At first doing your own property management may seem simple. But there is an every changing Landlord Laws, building codes and tenant's rights that one needs to be aware of. As a licensed Real Estate Broker we work with a wide range of investors. Whether you're a first time landlord or a well seasoned investor; we'll help you understand why it's important to hire the experts in Residential Property Management.
