

WAKE
CHRISTIAN ACADEMY

Kindergarten and Elementary School

The early years of learning lay the foundations for spiritual, academic, social and emotional success and are the time when children form basic beliefs and principles for life.

Wake Christian Academy offers a Christ-centered program with a strong academic focus to create an environment where children thrive. Our kindergarten and elementary students develop a love of learning, gain knowledge of God's word, and grow lasting friendships in our school community.

A Nurturing Environment

A close-knit environment and small class sizes mean young learners receive individual attention. Our passionate teachers get to know each student's unique learning style, helping each child reach his or her full potential.

Strong Academics

The core subjects of language arts, reading, math, social studies, science and technologies are emphasized throughout kindergarten and elementary school. Our curriculum is designed to help students master the fundamentals early on in their academic career and add deeper layers of knowledge as they grow older.

Biblical Integration

Spiritual formation is a primary focus at Wake Christian. All classes are taught from a Biblical perspective. Daily Bible studies, scripture memory activities, weekly chapel time, and missions opportunities help our younger students understand they are uniquely created in God's image and provide opportunities to serve others.

...As the decision for schooling approached, we prayed for God to place our children in the best environment to provide solid academics and to nurture their growing faith. We wanted a Christ centered education and world view, family involvement in the educational process, nurturing partnerships with teachers and administration, solid relationships with other WCA families and Christian friendships for our children. We've been at Wake Christian Academy for five years now, and we can say that we've received all this and more. We encourage you to come and join the WCA family!

-Travis and Kimberly Crissman

Engaged Learning

Thematic studies, special projects, field trips, and after-school clubs help engage kindergarten and elementary students more fully with academics. These activities also help children develop strong bonds with teachers and fellow students. Special projects include Creation, Colonial Day, Invertebrates, and Recycling, among others. During field trips students visit a dairy farm, the zoo, a farmer's market, the Capital, and other exciting destinations. Elementary club opportunities include Lego® robotics, running, golf, volleyball, engineering, cooking, photography, and more.

Dedicated to Enrichment

At Wake Christian, enrichment subjects are taught by dedicated subject specialists.

Our enrichment program includes:

- Weekly classes in art, music, Spanish, and media center starting in kindergarten.
- Computer classes begin in second grade.
- Physical education class begins in second grade. Recess is an important part of our daily activities.
- Chorus is offered starting in third grade. Band, strings, and handchimes are options starting in fourth grade.
- Individual Learning Center
